

Ideation Phase

Empathize & Discover

Date	02 October 2026
Team ID	SWTID-2026-5622
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

Empathy Map Canvas:

The Empathy Map Canvas is a user-centered design tool created to gain a deeper understanding of our key platform users—specifically IT Service Desk Agents, Incident Managers, and ServiceNow Administrators. By mapping out their operational environment, daily frustrations, and workflows, this exercise aligns technical requirements with real human needs.

In the context of the Implement Client Script & UI Policy (Incident) project, this canvas captures how team members experience data entry issues, manual verification burdens, and SLA risks, highlighting why automated form validation and dynamic client-side controls are critical for daily operations.

Example:
