### 1. Purpose of Document

The purpose of this document is to briefly explain the test coverage, execution summary, and open issues of the Implement Client Script & UI Policy (Incident) project at the time of the release to User Acceptance Testing (UAT). This project validates ServiceNow client-side controls, ensuring dynamic field behaviour, automated urgency assignment, save-time validation, and list-editing restrictions on Incident records.

### 2. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level, along with their resolution breakdown during the testing phase.

| Resolution     | Severity 1 | Severity 2 | Severity 3 | Severity 4 | Subtotal |
|----------------|------------|------------|------------|------------|----------|
